

Oney is committed to respect the Paris Agreements to limit our carbon footprint

MORE FAIR  
MORE HUMAN  
MORE SUSTAINABLE

Our actions for a better world

## The 2020 Carbon Footprint of Oney Group is :

13 950  
TEQ CO2\*

\*Without the footprint of the financing of our customer's purchasing projects and the customer's travel for the countries involved

Change of methodology between 2019 et 2020, transition from GHG to ADEME protocol  
TEQ CO2 : tons équivalent CO2

Our carbon footprint breaks into 4 main categories :

Purchasing

59%

Transports

18%

Capital goods

15%

Energy

8%

In order to help limit global warming to well below 2°C, Oney has set up a carbon emissions reduction trajectory based on the SBTi methodology (Science Based Targets initiative) and aligned with the BPCE's objectives

### Our reduction targets for 2024 are :

Reduce by 10% our emissions in absolute for scope 1&2 (related to energy)

Reduce by 8% our emissions in intensity for scope 3 (IT equipment and transports)

Support our suppliers (those who represent 50% of our carbon emissions related to purchased goods and services) in a carbon reduction trajectory.

### To achieve these results, we set up :

A strategic steering of the carbon reduction trajectory at Group level with all the entities and the involvement of our professional experts.

Reduction actions for all Oney Group subsidiaries on all scopes (1, 2 & 3).

Working groups on themes related to the trajectory (e.g. Sustainable purchasing).

Raising awareness of all employees about the impact of the Group's activities on the environment.

Together for a fairer, more humane and sustainable world
